# RAPID RESPONSE UNIT

*With all the same, great features of the larger models but in a smaller, more nimble machine the 'One Cube' is THE new, essential element of any highways repair fleet. Ideally suited for use as a 'first responder' vehicle to FIND & FIX and MAKE SAFE the most urgent defects while simultaneously logging and reporting less urgent repairs to be added to scheduled repair programmes.*

*Combining two functions in each cost-saving dispatch.*

Lower MPG = lower fuel costs = lower emissions / Can be driven by anyone with a 7.5t licence / Easier access for smaller, narrow lanes / less disruption to traffic / all capabilities achieved with lower volume

Bespoke built to your specification at our Rugby, UK facility including all the standard features found on the larger models plus optional extras to suit your needs.
